

Example: Initial Conditions

The Einsteinville Plant has begun a normal workday. The morning traffic rush is cleared out and normal operations are begun.

The weather is [pre-approved simulation] cool with an expected high of 72 degrees. Winds are light and variable between 1 to 3 miles an hour from the south to the north. The humidity is 40% and no rain is forecast within the next 24 hours.

The 24-hour and 5-day forecasts indicate a continuation of today's conditions.

It is 8:30 a.m. local time.
