

Example: Exercise Objective

The exercise objective may be

“Make notifications in accordance with the Einsteinville Emergency Plan.”

Although the objective is correctly stated, the emergency plan only identifies **who** makes the notification. It does not identify **the process** by which the notifications are made and who is notified. The emergency plan implementing procedures (EPIP) for notifications provides the needed information, the format of the notification form, the process (e.g., telephone, facsimile, e-mail) of the notification and who is to get the notification. A better objective would be:

“Make notifications in accordance with the Notifications EPIP.”

This exercise objective provides more complete information.
