

And then on the MSEL, more detail is added between +20 and +35 based on procedure.

In MSEL, enter the following:

- +05 Incident Commander's initial assessment complete
- +20 Plant Shift Superintendent categorizes the event as an **Operational Emergency** and classifies it as a **Site Area Emergency**
- +20 [Begin adding the process for the notification as outlined above]
- +35 Initial notification complete [Classified at +20 minutes with a 15-minute notification requirement]

Example: Add MSEL Events			
Time	Message Number	Message Summary	Expected Response
+20			PSS categorizes the event as an Operational Emergency and classifies as an SAE. Command Center Assistant (CCA) begins to fill out notification form.
+25			CCA completes form and submits to PSS for approval. PSS begins to review form.
+28			PSS approves the notification form. CCA begins to fax notification form.
+30			CCA calls DOE HQ to ensure receipt of the form and logs the call. DOE HQ notification is complete.
+32			CCA calls State Operations Officer to ensure receipt of the form and logs the call. State notification is complete.
+33			CCA calls County 911 Center to ensure receipt of the form and logs the call. County notification is complete.
+35			Initial notification is complete.
