

Example: Message Methods		
Method	Design	Delivery
Voice	<p>Controllers inject oral messages to control progress of the exercise scenario.</p> <p>These messages include descriptive information that simulates an event or condition, or they may initiate a specific activity that will keep the scenario on track.</p>	<p>These messages are given by the Controller on location, or over the phone or radio by a Controller at a different location such as a control cell.</p> <p>At specified times, Controllers will contact the appropriate Responders (Players) and read the prepared condition or event text verbatim.</p>
Hard Copy	<p>Designed to simulate electronic messages, memoranda, Material Safety Data Sheets, strip charts, news bulletins, etc.</p> <p>Messages of this type are provided on data cards or sheets of paper with appropriate time-related facility/site and hazards parameters, real-time data generated by a simulator or computer, or audiovisual presentations of data such as moulage, charts, or pictures.</p> <p>Parameters can be posted on appropriate control room panels, on cameras for viewing in several locations, or posted at, or generated by, computer terminals and printers. When hard copy messages are provided, the Controller makes no additional comments.</p>	<p>At designated times, Controllers will deliver these messages to the appropriate Responder (Player).</p>
Face-to-Face	<p>Occasionally, selected Controllers may play the role of a senior official, a decision maker, or an outside agency representative.</p>	<p>While role-playing, the Controller interacts face-to-face with Participants and provides information or responses to questions in a fashion appropriate for the role he/she is playing.</p>
